Early a.m. all-news radio WAVA today reported DJ confirmation of FBI Segretti investigation, no other details. It seems to have UPI service. There was no story in the edition of the Post we get. Got into town too early for NYTimes, which couldn't have arrived by then. No AP B wire story in local paper. It is a rather interesting development on which I'd appreciate anything you see, for there is presumeably nothing now known that was not known before. As for law violations, the charge used against the Chicago 7 would be at least enough for a legitimate justification of investigation from the first, from what has been published, so I infer the downplay was not accidental. Aside from election-law charges. Seems unlikely that this kind of story would break too late for Monday a.m.s. HW 2/12/73
